Internal Text Wrap

A footnote consists of two linked parts: the footnote reference number that appears in text, and the footnote text that appears at the bottom of the column. You can create footnotes or import them from Word or RTF documents. Footnotes are automatically numbered as they are added to a document. Numbering restarts in each story. You can control the numbering style, appearance, and layout of footnotes. You cannot add footnotes to footnote text. The width of the footnote text is based on the width of the column containing the footnote reference marker.

You can select and apply character and paragraph formatting to footnote text. You can also select and change the appearance of the footnote reference number[1], but the recommended method is using the Document Footnote Options dialog box[2]. A footnote consists of two linked parts: the footnote reference number that appears in text, and the footnote text that appears at the bottom of the column.
